

MARKET UPDATE

- The Nigerian bourse closed today's trading session on a positive note as the All share index advanced marginally by **45bps**; Year-to-date, the index is down by **2.22%**. Week to date the index lost 62bps.
- A total of 18 stocks gained points while 26 stocks lost points.
- Structured/Cross Trades – NB, DANGCEM, GUINNESS.
- The market was very quiet again today with \$8.95m traded in value. The distraction from the EM sell-off, increase in US interest rates (possibly causing preference for dollar assets), election risks and lack of major catalysts have all been touted both individually or collectively as the reasons for the apathy in the market, but at this point, stakeholders are asking if there's more to this than the reasons listed above. While the low level of activities and lower prices may be causing some concern, the decrease in the level of decline in prices may however be comforting, pointing still to continued resilience. We expect a similar quiet session on Monday.
